PROFESSIONAL PREPARATION DIRECTORY FOR ELEMENTARY SCHOOL PHYSICAL EDUCATION

INTRODUCTION

The National Association of Sport and Physical Education is proud to present the first Professional Preparation Directory of Elementary School Physical Education made possible by the work of its Elementary School Physical Education Council.

Better physical education programs for elementary and pre-primary children - this professional goal has been the focal point for unprecedented interest during the past decade. With this surge in interest, of course, came a great demand for specialists prepared to teach children. The profession, however, was unprepared to meet the demands. Until the 1970s only a small percentage of elementary schools had physical education teachers as full-time staff or as resource persons.[1,2]

Several institutions of higher education began to make changes and numerous others sought help. A foresighted committee developed Guidelines[3] in 1970 which are still very sound today. This was followed by a position paper on quality elementary school physical education programs[4] stating the need for qualified physical education teachers full-time or at least as resource persons. A conference was held in 1972 at Lake of Ozarks, Missouri involving representatives of both dance and physical education; this resulted in a publication of the proceedings.[5] Meanwhile, AAHPER headquarters continued to receive many requests for assistance in designing professional preparation programs for the elementary level. A series of articles[6,7,8] were prepared following which a list of schools and colleges offering programs were developed as a result of a survey for the 1972 conference and a dissertation by David Staniford.[9]

The Elementary School Physical Education Council recognized the need to publish a directory of institutions offering programs - not as a model - but as a service to all colleges and universities wishing to revise their professional preparation programs and as a reference for undergraduate and graduate students seeking specific help in selecting schools for study. Information from a special survey plus other sources served as the basis for a publication modeled after the highly successful and time-tested directory of the National Dance Association.[10] This culminated in the first edition of Professional Preparation Directory of Elementary School Physical Education presented here.

The Directory will be revised and reprinted every two years. The Council is aware that there are omissions by the limitation of the survey and by failure of schools to respond. However, all institutions which meet the criteria have an opportunity to be included in the next edition by forwarding appropriate information to the editors.

Consultant for Elementary Education

PREFACE

The undergraduate elementary school physical education programs in this publication are printed as they have been presented by the institutions offering these programs. (A copy of the questionnaire is included in Appendix B.) Only those schools are included which responded to the questionnaire. In no way is this directory intended to indicate the quality of a program or school. The purpose of publishing the directory is:

> . . . to assist prospective major students and counselors in providing answers to such questions as: What is the size of the elementary physical education specialization program at a particular university? What are the courses leading to the specialization? Who are the faculty?
>
> . . . to permit chairpersons of college and university physical education programs and others interested in elementary physical education programs to become aware of the nature and growth of such programs and also to have a source for determining curriculum offerings and personnel at various institutions.

The questionnaire was mailed in the spring of 1977 with a follow-up mailing in the fall. The initial mailing list was derived from the Stanford Study[1] conducted in 1975. Of 315 schools contacted, 174 responded. This Directory presents 124 institutions as offering some type of program focus for the elementary physical education specialist. Institutions which did not have any specialization in elementary physical education for major students are not included. An alphabetical list of all institutions in this Directory is included in Appendix A.

The Directory includes information just as it was submitted. In some cases there was no response to a particular item, so no information is recorded. As noted in the Directory, some institutions offer special preparation in elementary school physical education as: major, minor, track, specialization, emphasis, option. The item indicating whether the institution is on the quarter hours or semester hours system is identified by "Q.H." or "S.H." at the top of the listing of credit hours for the courses.

The compilers wish to thank David Staniford, John Fowler, Margie R. Hanson and the Elementary School Physical Education Council for the opportunity to compile this Directory and for their assistance. Special appreciation is also extended to Gloria Fortson for her typing of the Directory.

CHILDREN LEARN PHYSICAL SKILLS

Learning programs designed to provide parents, teachers and specialists with techniques and suggestions for developing movement abilities in early childhood. Two separate volumes are available – one for use with infants, from birth to 3 years, and the other for children, ages 3-5 years. The activities, organized in systematically planned "sessions" are directed toward open learning situations in which children can get self confidence through movement. By Liselott Diem, internationally recognized authority in the field (translated from the original volumes in German). 1978

ECHOES OF INFLUENCE FOR ELEMENTARY SCHOOL PHYSICAL EDUCATION

A publication which brings together some of the best that has been written and said about physical education in the elementary school since 1970. Includes selected papers and articles identifying and exploring contemporary issues, research findings, and differing points of view about many topics – from both practical and philosophical points of view. An excellent resource to anyone interested in physical education for children. 1977.

WHO CAN...

Twenty series of pictures, with text, illustrating education for movement in the primary grades. Offers a selection of basic activity forms – with variations and progression – which are based on movement fundamental to more complicated patterns as evidenced in more refined specific sports skills. The activities presented embody creative approaches to the traditional, meeting the needs of children to discover how to use their bodies efficiently. The activities covered require only simple equipment that can be used in and out of the gymnasium. Designed for use by the classroom teacher, advanced or beginning specialist, and in courses of professional preparation. By Liselott Diem, internationally recognized authority in the field. 1977.

MOVEMENT ACTIVITIES FOR PLACES AND SPACES

A new book for the physical education specialist, classroom teacher, and professional preparation department. Offers methods and activities in physical education which can contribute to each child's maximum development. Designed to encourage development of motor skills, create situations in which children can make choices in an atmosphere of freedom, and allow children to participate in enjoyable movement experiences which help to develop a desire for continued participation in physical activities. 1977.

CAREERS IN PHYSICAL EDUCATION AND SPORTS

Developed for high school students interested in investigating a career as a physical education teacher, athletic coach, recreation leader, sports official, athletic trainer, sports journalist or photographer, physical therapist, physical education and/or athletic administrator, professional athlete or sporting goods dealer. Presents a brief description of each occupation, as well as information on educational preparation, salary range and current occupational outlook. 1977.

GAMES TEACHING

A selection of articles with ideas representative of some contemporary thinking on games and game teaching in elementary school physical education. Covers instructional methodology as well as practical ideas for content and organization. Reprinted from the Sept. 1977 issue of the *Journal of Physical Education and Recreation.*

PREPARING THE ELEMENTARY SPECIALIST

Designed to provide information and guidelines for the initiation, development and improvement of professional preparation programs for elementary school specialists in dance and physical education. Proceedings of the April 1972 national conference at Lake of Ozarks, Mo. 1973.

STATE REQUIREMENTS IN PHYSICAL EDUCATION FOR TEACHERS AND STUDENTS

A state-by-state compilation of certification requirements for elementary and secondary school physical education teachers, with a separate section setting forth laws and regulations affecting physical education. 1973.

PERSONALIZED LEARNING IN PHYSICAL EDUCATION

A new book for teachers and administrators at all levels who are interested in the why and how of individualized instruction and personalized learning in physical education. The emphasis of Part One is on clarifying the concepts of personalized learning, while Part Two offers practical applications at the teacher-student level, both in the form of specific delivery systems and general suggestions and recommendations. Diverse points of view are presented and readers are encouraged to contrast, compare and select from the teacher-learner options presented. 1976.

WHAT EVERY PERSON SHOULD KNOW ABOUT THE NEW PHYSICAL EDUCATION

An interpretative leaflet for distribution to parents, decision makers and others in mailings, at meetings, games, demonstrations and similar events.

EVERY CHILD A WINNER

The PEPI Project's second film, designed to enlist support for the new physical education in elementary schools. The dramatic message is that every child – not just the athletically gifted, can develop self-confidence and spontaneity through creative programs.
